Demat account holders would be able to cast their vote without having to register again with the ESPs, thereby, not only facilitating seamless authentication but also enhancing ease and convenience of participating in e-voting process.

Step 1 : Access through Depositories CDSL/NSDL e-voting system in case of individual shareholders holding shares in demat mode:

- (iv) In terms of SEBI Circular No. SEBI/HO/CFD/CMD/CIR/P/2020/242 dated 9 December, 2020 on e-voting facility provided by Listed Companies, individual shareholders holding securities in demat mode are allowed to vote through their demat account maintained with Depositories and Depository Participants. REPORT ON MANAGEMENT DISCUSSION AND ANALYSIS

REPORT ON MANAGEMENT DISCUSSION AND ANALYSIS

A. INDUSTRY OVERVIEW:

Welcast Steels Limited ("WSL"), manufactures a wide range of consumable wear parts (mill internals) High Chrome Grinding Media of various sizes which are used in the process of Crushing and Grinding in Cement, Mining and Thermal Power industries. The Company employs casting process for the manufacture of these products.

The Cement Industry has practically use the High Chrome consumable wear parts, whereas in the mining industry migration from the use of conventional method using forged grinding balls to the use of High Chrome Grinding Media is still in progress. Hence there is a considerable growth opportunity in the mining sector. Estimated annual consumption of Grinding Media for the mining segment is 2.50 million tons with around 20% of the same migrating from the conventional usage of forged castings to High Chrome. Thus a sizeable growth opportunity of is available. Hence considerable demand for our product is expected from mining Industry in Copper, Gold and Iron ore mines.

So far as the Cement industry is concerned there has been a strong growth trend in the cement demand already at the pre Covid-19 level. We believe that going forward cement industry should continue to grow at a near double digit growth rate in India matching with this our supplies to the cement industry will also therefore grow in tandem. With the considerable headroom available for migrating from the usage of conventional method of grinding (using forged castings) to High Chrome by mining industries, our company should not have any material adverse impact on our stability at least at present level. However, while we remain cautiously optimistic we are carefully and diligently monitoring the situation.

During the second half of the financial year 2022-23 prices of the basic raw materials are stabilized and the differential prices are passed on to the customers.

B. SEGMENT WISE PERFORMANCE:

The Company primarily operates in only one segment i.e. manufacturing of High Chrome Grinding Media Balls.

C. OUTLOOK AND PROSPECTS:

WSL's prospects are linked to activity in basic industries of Mining, Cement and Thermal Power generation. These industries are just recovered from the COVID interruption resulting in rapid recovery in consumption and in turn manufacturing and services activity saw a sharp increase which allowed WSL to ensure continued operations.

Hence in terms of sales quantities the total sales volume in F.Y. 2022-23 at around 9073 MT looks more or less the same as the sales volume achieved in F.Y. 2022-23.

Going forward, WSL continues to maintain its stability reduction in operating costs in terms of wear costs, power costs and reagent consumption. This value addition is offered by continuous and direct engagement with operations personnel at plants.

D. CAPEX PLAN:

There are no immediate capex plan except for maintain / modernization of the pollution control machineries of the plant to meet the statutory requirements.

E. RISKS AND CONCERNS:

The Company is exposed to normal operating business risks, similar to most manufacturing companies like fluctuations in raw material prices, labour unrest, reduced demand etc. which are mitigated by regular monitoring and corrective actions.

Key risks that the Company faces are around stability in the mining market, foreign exchange rate fluctuation, fluctuation in raw material prices, debtor defaults.

F. INTERNAL CONTROL SYSTEMS AND ADEQUACY:

The Company's Internal Control Systems are commensurate with the size and nature of its operations, aimed at achieving efficiency in operations, optimum utilisation of resources, reliable financial reporting and compliances with all applicable laws and regulations. The system also provide reasonable assurance that all assets are safeguarded, transactions are authorized, recorded & reported properly to ascertain operating

If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Management's responsibilities for the financial statements

The Company's Board of Directors is responsible for matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and the cash flows of the Company in accordance with the IND AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in

AUDITOR'S REPORT

accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial control system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements maybe influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

**ANNEXURE-“A” TO THE INDEPENDENT AUDITORS' REPORT ON THE FINANCIALS STATEMENTS OF WELCAST STEELS LIMITED FOR THE YEAR ENDED 31 MARCH 2023**

(Referred to in Paragraph 2(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls with reference to the aforesaid Financial Statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)**Opinion**

We have audited the internal financial controls over financial reporting of Welcast Steels limited (“the Company”) as of March 31,2023 in conjunction with our audit of the financial statements of the company for the year ended on that date.

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31,2023, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal financial Control Over Financial Reporting issued by the Institute of Chartered Accountants of India (the 'Guidance Note') .

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial control based on the internal control over financial reporting criteria established by the company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, issued by the Institute of Chartered Accountants of India ('ICAI') and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

**Meaning of Internal Financial Controls Over Financial Reporting**

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

- (1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

This includes a financial reporting team that has overall responsibility for overseeing all significant fair value measurements reports directly to the Chief Financial Officer. The financial reporting team regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as pricing services, is used to measure fair values, then the financial reporting team assesses the evidence obtained from the third parties to support the conclusion that these valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which the valuations should be classified. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Transactions in foreign currencies are translated into the functional currency of the Company at the exchange rates at the dates of the transactions. The exchange differences, if any, are recognised in the statement of profit and loss.

(b). Financial instruments**Recognition and initial measurement**

Trade receivables are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions. The financial asset or financial liability is initially measured at fair value plus or minus, for an financial asset or financial liability not at fair value through profit and loss ('FVTPL'), transaction costs that are directly attributable to its acquisition or issue.

A financial asset is measured at amortized cost, which are transaction costs that are attributable to its acquisition.

A financial asset is measured at amortised cost if it meets both of the following conditions.

The asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and

The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and

The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition, the company irrevocably designate a financial asset that meets the requirements to be measured at amortised cost and by doing so either eliminates or significantly reduces an accounting mismatch that would otherwise arise.

(c). De-recognition**Financial assets**

The company de-recognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not de-recognised.

Financial liabilities

The company de-recognizes a financial liability when its contractual obligations are discharged or cancelled, or expire.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

(d). Property, plant & equipment :**Recognition and measurement**

Items of property, plant and equipment are measured at cost, which includes capitalized borrowing costs, less accumulated depreciation and accumulated impairment losses, if any. Cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use. The cost of a self-constructed item of property, plant and equipment comprises the cost of materials and direct labour, any other costs directly attributable to bringing the item to working condition for its intended use. If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment. Any gain or loss on disposal of an item of property, plant and equipment is recognized in statement of profit and loss.

Notes to the Financial Statements as at 31 March, 2023

(Contd..)

Subsequent measurement :

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

Depreciation

Depreciation on fixed assets is charged on written down value method over the useful life of assets as prescribed by Schedule II (except for Plant & Machinery for which useful life determined as per technical estimate) of Companies Act, 2013 as follows:

Asset Class	Useful life of asset in years
Plant & Machinery	7.5 to 15
Factory Building	30
Furniture & Fixtures	10
Office Equipment's	5
Motor Cars	8
End user devices, such as desktops, laptops, etc.,	3
Servers & Networks	6
RCC Road	10

Cost of assets not ready for intended use, as on the Balance Sheet date, is shown as capital work in progress. Advances given towards acquisition of fixed assets outstanding at each Balance Sheet date are disclosed as Other Non-Current Assets.

De recognition

The carrying amount of an item of property, plant and equipment is de-recognized on disposal or when no future economic benefits are expected from its use or disposal. The consequential gain or loss is measured as the difference between the net disposal proceeds and the carrying amount of the item and is recognized in the statement of profit and loss account.

(e). Intangible asset

Intangible assets are initially measured at cost. Such Intangible assets are subsequently measured at cost less accumulated amortisation and accumulated impairment losses, if any. Computer Software being Intangible asset amortized over a period of 3 years on WDV basis.

Amortisation method, useful lives and residual values are reviewed at the end of each financial year and adjusted if appropriate.

(f). Inventories

Inventories are measured at the lower of cost and net realisable value. The cost includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their present location and condition. Costs incurred in bringing each product to its present location and condition are accounted for as follows:

Raw materials / Stores and Spares: Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition excludes credit of refundable taxes. Cost is determined on weighted average cost basis. However raw materials and other inputs held for use in or in relation to production are not written down below cost if the finished products in which they will be used are expected to be sold at or above cost.

Finished goods and Work in progress: Cost includes cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs. Cost is determined on weighted average cost basis

Net realizable value is the estimated selling price in the ordinary course of business. The net realisable value of work-in-progress is determined with reference to the selling price of the related finished products.

The comparison of cost and net realizable value is made on an item- by-item basis.

**(g). Revenue recognition:****Sale of goods**

Revenue is recognized upon transfer of control of promised goods to customers for an amount that reflects the consideration which the company expects to receive in exchange for those goods.

Revenue from the sale of goods is recognized at the point in time when control is transferred to the customer, which generally coincides with the delivery of goods to customers, based on contracts with the customers.

Revenue is measured based on the transaction price, which is the consideration, adjusted for discounts and returns, if any, as specified in the contracts with the customers. Revenue excludes taxes collected from customers on behalf of the government.

(h). Other income

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective applicable interest rate.

(i). Employee benefits**Defined contribution plans:**

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. The Company makes specified monthly contributions towards government administered provident fund scheme. Obligations for contributions to defined contribution plans are recognised as an employee benefit expense in statement of profit and loss in the periods during which the related services are rendered by employees.

Defined benefit plans:

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company's net obligation in respect of defined benefit plans is calculated separately for each plan by estimating the amount of future benefit that employees have earned in the current and prior periods, discounting that amount and deducting the fair value of any plan assets.

The Company makes contributions to the employees' group gratuity-cum-life assurance scheme of the Life Insurance Corporation of India. The net present value of the obligation for gratuity benefits is determined on actuarial valuation conducted annually by an independent Actuary using the projected unit credit method, as adjusted for un recognized past service cost, if any, and as reduced by the fair value of the plan assets, is recognized in the accounts. Remeasurements, comprising of actuarial gains and losses are recognized immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

Compensated absence:

The Company has a scheme to compensate absence for employees. The liability of which is determined on the basis of an actuarial valuation carried out by an independent actuary at the end of the year. The actuarial gains or losses are recognized in full in the statement of profit and loss for the period in which they occur.

(j). Provisions (other than employee benefits), contingent liabilities and contingent assets**Short term employee benefit**

Short term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognized for the amount expected to be paid e.g., short-term cash bonus, if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the amount of obligation can be estimated reliably.

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an out flow of economic benefits will be required to settle the obligation. Provisions are determined by the expected future cash flows (representing the best estimate of the expenditure required to settle the present obligation at the balance sheet date).

**Onerous contracts**

A contract is considered to be onerous when the expected economic benefits to be derived by the Company from the contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision for an onerous contract is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract.

Contingent liability

A possible obligation that arises from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the company or; present obligation that arises from past events where it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or the amount of the obligation cannot be measured with sufficient reliability are disclosed as contingent liability and not provided for.

Contingent assets

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent assets are not recognized and disclosed only when an inflow of economic benefits is probable.

(k). Taxation

Current tax Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date. Current tax assets and current tax liabilities are offset only if there is a legally enforceable right to set off the recognized amounts, and it is intended to realize the asset and settle the liability on a net basis or simultaneously.

Deferred tax

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes. Deferred tax is also recognized in respect of carried forward tax losses and tax credits. Deferred tax assets are recognized to the extent that it is probable that the future taxable profits will be available against which they can be used. The existence of unused tax losses is strong evidence that the future taxable profit may not be available. Therefore, in case of a history of recent losses, the Company recognizes a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realized. Deferred tax assets – unrecognized or recognized, are reviewed at each reporting date and are recognized / reduced to the extent that it is probable / no longer probable respectively that the related tax benefit will be realized. Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on the laws that have been enacted or substantively enacted by the reporting date.

(l). Impairment of assets

At each Balance Sheet date, the management reviews the carrying amounts of its assets included in each cash generating unit to determine whether there is any indication that those assets were impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of impairment loss recoverable amount is the higher of an asset's net selling price and value in use. In assessing value in use, the estimated future cash flows expected from the continuing use of the asset and from its disposal are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of time value of money and risks specific to the asset. If such recoverable amount of the asset or the recoverable amount of the cash generating unit to which the asset belongs is less than its carrying amount, the carrying amount is reduced to its recoverable amount. The reduction is treated as an impairment loss and is recognized in the statement of profit and loss. Impairment losses recognized in prior

years, if any, are reversed when there is an indication that recognized impairment losses for the asset, no longer exist or have decreased. However, the increase in carrying amount of an asset due to reversal of an impairment loss is recognized to the extent it does not exceed the carrying amount that would have been determined (net of depreciation) had no impairment loss been recognized for the asset in prior years.

(m). Cash and cash equivalents

Cash and Cash equivalents for the purpose of Cash Flow Statement comprise cash and bank balances, demand deposits with banks where the original maturity is three months or less and other short-term highly liquid investments not held for investment purposes.

(n). Earnings per share

Basic earnings per share is arrived at based on net profit after taxation available to the equity shareholders to the weighted average number of equity shares outstanding during the year. Diluted earnings per share is calculated on the same basis as basic earnings per share after adjusting for the effects of potential dilutive equity shares.

(o). Borrowing cost

Borrowing costs are interest and other costs incurred in connection with the borrowing of funds. Borrowing costs directly attributable to acquisition or construction of an asset which necessarily take a substantial period of time to get ready for their intended use are capitalized as part of the cost of that asset. Other borrowing costs are recognized as an expense in the period in which they are incurred.

(p). Events after reporting date

Where events occurring after the Balance Sheet date provide evidence of conditions that existed at the end of the reporting period, the impact of such events is adjusted within the financial statements. Otherwise, events after the Balance Sheet date of material size in nature are only disclosed.

(q). Segment reporting

The company manufactures and deals with a single product, Alloy steel Cast Grinding Media. Also Company's operations are solely situated in India. Hence there are no reportable segments as required by Ind AS - 108 "Operating Segments" under the Companies (Indian Accounting Standards) Rules, 2015 (As amended). For the disclosure on reportable segments see Note 44.

(r). Operating cycle:

Based on products / activities of the company and normal time between acquisition of assets and their realization in cash / cash equivalent, the company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

(s) GST input credit:

Goods and service tax (GST) input credit is accounted on an accrual basis on purchase of eligible inputs, capital goods and services. The balance of GST input credit is reviewed at the end of each year and amount estimated to be un-utilisable is charged to the statement of profit and loss for the year.
